### **Abstract**

This paper aimed at assessing the Impacts of Political Interference in Public Administration. The key findings included challenges facing public administrators in executing their responsibilities due to political interference. These lead to maladministration, abuse of power, improper conduct, inexcusable delay, poor service delivery and lack of commitment among public staff. This paper concluded that political interference was due to the inadequate power and responsibility separation between politics (policy) and public administration (execution). The paper suggests that the society should follow cultured way of life, so as to have peace in society.

**KEYWORDS:** Political Influence, Political Interference, Administration, Public Institution

---

Administration and police are interdependent, interactive and interrelated to each other. It is said that Administration and politics are two sides of one coin. Political power is universal. There is no constitutional power in other institution or organization except state. Even if there is limitation of the national and international impressions on the fundamental power of the state, now a days, there is the fundamental power to the state. The administration of the state is run by the people who are elected through election process.

Political leaders, as the MLA, are elected in India with specific Period. After five years, many people of political parties take part in election. Many parties propagandize their through the manifesto (Jahirnama) media and many promises, and gifts are given to the people in the election, directly by the candidate. The candidates abandon the election directives.

Many people make serious mistakes, social crime by involving in such temporary promises. When they elect the representative of the people.

They never feel anything bad about what they are doing. The MALA'S ministers are elected in a wrong way and unsocial way or by hook or crook.

The staff and office of the administration are selected by taking different examinations through the awards. We cannot say that all appointments of the offices are logical rankings. or qualitative. It is difficult to bind quality and knowledge in the political leaders. At the sometime the appointment of the officers.

in general the political leaders is different. There are different criteria to appoint administrative official than participation in politics. Even though there is a relation between these two provinces.

I have tried to present this subject, Political interferences in police administration, by taking the interviews of local police officers in police department and also asking them some questions about this matter.

The male and female running police officials of higher post have exposed their ideas, thoughts before me but they put a condition to not open their name. Political leaders interfere mainly in police department in the matters of the election. At the time of appointment in police department or at the time promotion or transfer, sometimes there is interference in the involvement of crime. Actually the political power decides the matter, policy and aims of economical, social, religious, cultural educational matters for the people of the state.

The implementations of the policies are being implied by the offices of administration.

It is never mind, if the political interference for the welfare of the people. But he political interference is wrongly used for only people interest, relatives and friends . It is wrong if it is not applicable.

There is also found an unwanted political interference for self interests, by these people , by creating some difficulties, problems, in the official matters.

Political leaders interfere the police administration by threatening to the officer. As a result of that administrative officers are trapped under the law the real criminals, political leaders are set free, for lack of evidence. As a result they live happily.

If the political interference is controlled positively or cleared, the people, they have got a right to control the officers. So the social work will come because representative of the people are elected by is over in time. But in fact, political interference cannot be avoided because they are representatives of the people. Suppose one of the officers stick to the duty the law and regulation , he will be transferred from that place to a rural area.

Giving no promotion, as the abilities, sending to rural places trying to those officers by using local powers, local misbehavior torturing. Such incidents are common.

At last doubtful officers also try to adjust in such atmosphere. They prefer to accept the ways of adjustment because there is no other way.

It is easy to face one the common people. But it is not easy to face the one the political leaders , they use the power of politics not listen to the political leaders or parties. If the officer did not listen to the political leaders, they use the power of politics and they can harm the police officers. The corruption is increased in the police departments due to increasing political interference. As a result of the corruption, help the

crime people make the client run, make the investigation directionless as slowly. Helping to destroy evidence and witness these things occur.

It seems that crime in politics is so rampant that some political thinker and it is said that politics is becoming crime oriented not for the people. The attitude of the crime is entered in politics. The relation is established between crime and politics.

### **There is the co-relation between politics and crime.**

The criminals are using political force to solve their problems. This is supporting their crime nature. To sidelong the affairs of corruption in politics. The political leaders appoint the enquiry commission which is powerless and they just make a show of enquiry. The commission traps some others. Giving a clean chit to the political leader. In short I would say that political interference is the part of police administration and these are the two sides of one coin.

In spite of that, political interference is done for the welfare of the people, but today, it is extravagant. It is not applicable in a large scale.

It must be improved. It is necessary to improve it. Improved long merits scheme involve, corruption orthodox costumes, terrorism (regional) injustice on women, inequalities in women create such delicate problems. Political leaders and officers are chosen through the society. Now a day's social values are disappeared in human life, it is the birth place of bad attitudes without values whatever society provides, creates such terms are fixed in the section coming from the society, if the political leaders and officers are corrupted, selfish, uncultured it is not right to blame to the political leader and officers. So it is not right for the society.

Social, moral, interactive education should be given from childhood by waiting and scanning unselfish thoughts in the minds of the people.

There must be difference in action and implementation such ideas must be put in the mind of the people, sacrifice life should be taught, material life should be avoided, prevented and controlled it inculcates the thought of social awareness instead of egoism.

Students be motivated and inspired not to run after the money and the publicity. Man should be completed to take part in national integration.

In a social gratitude, government and every human being should honestly try to do only work, and then political interference is not objectionable. In short, It is said that interference is in every region, as though political interference in police department. If this interference is positive, qualitatively controlled, it will be suitable and useful for the people.

If interference is not possible to avoid, societies should be changed, by accepting new values, new culture flowing of social mind should be turned to sacrifice life If there is the dirtiness in the mind of the people corruption in the society will be on a large scale. We must plan to make mind cultured from childhood. It is necessary for us by

accepting the ways of sacrifice life to avoid the political interference in police administration.
